

Before Your Repipe Begins

There are some things that we need for you to do to prepare your home for our crews to perform the repipe.

1. Take everything from underneath all your sinks and vanities.
2. Move everything from the area around your water heater and washing machine.
3. If you have a closet (linen, bedroom, hall) that backs up to a shower, remove all items from floor to about waist high. The plumbers will use this area to access the shower instead of cutting through a surround or cutting the tile.
4. It is necessary to secure anything fragile that may be in the way of our plumbers carrying materials through your home. Please move all such items to a safe place to reduce the risk of anything being broken.
5. Our Plumbing Express crews will move any furniture but they will not move any of the following: computer equipment, electronics, antiques or breakables. Please have these items moved prior to your start date.
6. Our drywall crews will reset any moved furniture. We suggest that you be available on the last day of the job to direct furniture placement and review the drywall work.

If you have any questions or concerns regarding the preparation of your home, please give us a call at 703-461-0344 and ask to be directed to the repipe division.
